

SECURITY PACKAGES

Be notified immediately if the doorbell rings, the garage door was left open or the water heater leaks. These security packages will alert you, either immediately or after a specified amount of time, that an event has occurred that needs your attention.

FEATURES:

- *Receive a notification if you left the garage door open. Use the Control4 App to open or close the door remotely.*
- *Be alerted to a leak in your home the moment it occurs, allowing you to respond quickly.*
- *Get a text when your doorbell is pressed, letting you know when guests or packages arrive.*
- *Integrate these packages with other Control4 products, including: cameras, door locks, lighting and more; for a truly impressive automated experience.*

GARAGE PACKAGE:

Be reminded that your garage door was left open while you are headed to work or in the evening when you are turning in for bed. Receive a text alert after a pre-determined amount of time that it has been left open, set it to close on it's own, or remotely close it from the palm of your hand.

LEAK DETECTION PACKAGE:

A simple leak can wreak havoc on your home if not detected early on. The Water Leak Detection Package can alert you via text the moment a water leak occurs—whether it's a hot water heater, a hot tub or a fish tank—allowing you to respond quickly so you can prevent the leak from doing too much damage.

DOORBELL PACKAGE:

A ring of the doorbell can play notifications throughout the entire house (including the back patio) or a phone call can automatically pause your movie while you answer the phone.
